

2013 Field Day Events In Illinois

DR. EMERSON NAFZIGER

URBANA, ILL.

It's been a difficult planting season in Illinois, but crops will eventually be growing this year, and we'll find both expected and unexpected challenges as we move into the cropping season. Fields days organized by Crop Sciences at the University of Illi-

nois and other institutions will focus on crops

and pests, with speakers talking about current crop issues along with information from previous research. Each event will offer CEUs for CCAs.

Following is the schedule of crop-related 2013 field days organized by University of Illinois Crop Sciences and by several other institutions. Δ

DR. EMERSON NAFZIGER: Professor / Research Education Center Coordinator, University of Illinois

Event	Date – start time	Food	Contact
Macomb – WIU ^a	June 20 – 12:00 N	lunch	Mark Bernards (309) 298-1569
