

# Adams Fertilizer Celebrates 42-Year History

## DEWITT, ARK.

**A**dams Fertilizer Equipment was founded in 1966. Billy C. Adams and William W. Adams assumed control and became the principal officers in 1974.

In 1966, the product line consisted of Ground Drive Spreaders. Through the years the product line has expanded to include a complete line of fertilizer hauling equipment. Adams Equipment is marketed primarily to fertilizer dealers, farmers, golf course and municipal park maintenance personnel as well as lawn care professionals across the United States.

Adams Equipment is exported to South

America, Mexico and Canada. Adams has grown to be one of the leaders in the industry.

The Adams line of equipment includes:

- Ground Drive and PTO Driven Spreaders
- Liquid Nitrogen Applicators
- Custom designed Conveyor Systems
- and Conveyors of all types Elevator Legs
- Vertical and Rotary Blending Systems
- Truck and Trailer Mounted Tenders
- "Turf Management" Equipment
