

Cultivators Are Back At Perkins Sales

BERNIE, MO.

We have been serving the agricultural industry for 20+ years. It's our goal to make innovative technology available and new equipment that will help you save time and boost your bottom line. Cultivation is making a big comeback this year, with all the chemical resistant weeds, cultivation is an economical and efficient way to deal with hard to kill weeds. We offer Hiniker high residue, Field-Trek rolling basket and Buffalo brand cultivators. While the main purpose for a cultivator is to cultivate, additional options make it ideal for putting up beds, running water furrows, fertilize application and seeding. These are features that allow more versatility and added-value to your implement.

Planter customization is a big part of what we do. There are lots of accessories that will optimize your planters' performance without spending a fortune. We service your JD meters with Precision Planting eSets and MeterMax computer calibration.

In addition to Precision corn plates, we also offer Precision cotton plates. You can get real singulation, without doubles or skips, no matter what size seed you plant.

When you start to spray, remember that we carry parts, filters, automatic spray systems, and a large variety of spray tips. We also keep stainless fittings and poly fittings up to 3". We have many different brands of spray booms to suit your needs.

We keep rebuild parts for your JD or Case/IH cotton pickers. All our picker parts meet manufacturer's specifications or better; our prices beat manufacturer's prices, and that's better for you.

We would like to thank all of our customers for allowing us to serve them. We would also like to thank those who took time to read this and look forward to serving your agricultural needs. You can call us toll-free at 877-293-5794 or e-mail parts@perkinssales.com for a free catalog.
