SIKESTON, MO.

The District 7 Missouri Soybean Association held a Crop Management Conference recently in Sikeston, Mo. Nine speakers made presentations to the crowd and the Missouri Soybean Association elected two directors.

Dr. Grover Shannon gave an update on the soybean breeding program. Dr. Laura Sweets presented an update on soybean rust, while Bob Heinz and Dr. Allen Wrather covered the nematology lab and nematode management aspects of soybean production.

Dectes stem borer management was Dr. Kelly Tindall's topic. Dr. Bill Wiebold covered soybean production. Soybean fertility was explained by Dr. Gene Stevens.

The market update was given by David Reinbott. The Soybean Association update was presented by J.P. Dunn of the Missouri Soybean Association.

Following lunch the Missouri Soybean Association meeting was held where Matthew McCrate and Tom Raffety were reelected for the upcoming term. McCrate and Raffety join with Cindy Faulker and Larry Strobel to complete the board of directors for the District 7 Missouri Soybean Association. Δ
