

# Downloadable Field Capacity Calculator Available For Replanting Decisions

**KEISER, ARK.**

**F**lood stricken farmers looking at replanting have a downloadable tool to help them plan and time their post-disaster fieldwork.

The field capacity calculator can be found at: [www.uaex.edu/depts/ag\\_economics/budgets/2011/FieldCapacity.xls](http://www.uaex.edu/depts/ag_economics/budgets/2011/FieldCapacity.xls)

"Flooding is causing many Arkansas farmers to either replant crops or consider revising their original crop planting plans," said Archie Flanders, assistant professor-agricultural economics, for the University of Arkansas Division of Agriculture.

"The field capacity calculator is a tool to aid farmers in their decisions by determining the time required to complete field activities and to determine the acreage that can be worked with potentially shortened time periods for completing field work," he said.

Harvesting windows in the fall are especially important considerations that will be affected by planting decisions made now, Flanders said.

For questions or comments about interactive decision tools, contact Flanders at 870-526-2199, ext 108, or [aflanders@uaex.edu](mailto:aflanders@uaex.edu). Δ
