

# Ewing Field Tour To Feature Crop, Vegetable Studies

**MT. VERNON, ILL.**

**C**rop producers and others interested in agriculture will find valuable, research-based information at the Spring Agronomy Tour held at the University of Illinois Ewing Demonstration Center. The tour is set for Thursday, June 10, at 9 a.m.

A new feature this year is the inclusion of vegetables studies, which will be of interest to both commercial vegetable growers and avid home gardeners.

Dennis Epplin, U of I Extension crop systems educator, says there will be lots to see and learn

about:

- Long-term continuous no-till plots
- Long-term soil fertility plots
- Wheat variety trials
- Corn hybrid studies
- Sweet corn, tomato and pepper studies
- Clover plots

The Ewing Demonstration Center is located approximately 12 miles northeast of Benton, Illinois. From Illinois Route 37, turn east on Ewing Road and watch for signs. If weather conditions are questionable, call 618-242-9310 before traveling to the field day. Δ
