

# Farm Credit Services Offers Financing To Meet Farmer Needs

**LOUISVILLE, KY.**

**W**hen it's time for a farm operation to grow, make purchases for operating expenses, or simply buy a piece of equipment, Farm Credit Services of Mid-America offers loans for practically any farm need. A new barn, a feeding facility expansion and farm purchase are just a few of the items that can be financed through the offices throughout Tennessee.

"Farmers can choose from a variety of competitive interest rate programs combining security with savings. We offer adjustable rates and fixed rate financing. "In fact, Farm Credit is one of the few farm lenders offering long term fixed rates for farm real estate," said David Lynn, senior vice president of FCS offices throughout Tennessee.

In addition to real estate, operating and equipment financing for farmers, Lynn indi-

cated that FCS has recently introduced a new feature on their operating loans. "Our disbursement card gives customers convenient access to funds for purchases such as buying lumber for a new fence, order a new GSP for your tractor or purchasing a new computer for your farm operation – just about anything that helps keep the operation running," he said.

FCS also has a leasing program for facilities and equipment. Two of the major reasons people use leases are the tax advantages and the ease of cash-flow in an operation.

Whether your need seasonal funds or are making an equipment or real estate purchase or lease, Farm Credit is the lender of choice for many farm producers throughout Tennessee and rural residents. For more information, call any of the offices throughout Tennessee by dialing 1-800-444-3276 or look them up on the web at [www.e-farmcredit.com](http://www.e-farmcredit.com). Δ
