

Grown On Grass Program Proves Itself At Flying H Genetics

JOPLIN/CLINTON, MO.

Flying H Genetics is a leading supplier of Simmental, SimAngus, Balancer, Gelbvieh, & Angus genetics throughout the Midwest. We have dedicated ourselves to developing pasture ready bulls out of industry proven genetics the "right" way. Our Grown On Grass™ program is a proven process for testing fescue tolerance, hardiness, and overall durability. Bulls that make it through this process are ready to go to work immediately during their first breeding season and are free of all the health & soundness problems associated with feedlot tested bulls. I could continue telling you about our exciting program, but I will let our customers do the job!

"Over the last couple years, I have purchased over a half dozen bulls from Flying H Genetics. I have been very satisfied with the calving ease and growth of my calves from these bulls. As a Missouri cattleman, I like how these bulls are developed on fescue and can maintain themselves through the breeding seasons without falling apart. Also, their customer service is top notch. I know that if I am in the middle of a breeding season and I have a problem with a bull or need a quick replacement, they will take care of me."

Randy Steckly

West Central Missouri Cowman

"The Grown On Grass bulls I purchased last spring held their condition remarkably well for yearling bulls and worked hard enough to get every cow I put them on bred. In fact, they worked so well, I purchased a handful more last fall. I am also very anxious to see this year's calf crop out of my SimAngus cows bred to Balancer bulls."

John Parrish

Southwestern Oklahoma Cowman

"We placed 75 steers stemming from many generations of Flying H Herdbulls on feed for 183 days beginning in January 2008 right when corn prices were hitting \$6.00. Harvest weight averaged 1502 pounds, because they were age and source verified and destined for the Japanese market without over weight discounts. They produced the following data:"

ADG –	4.15
FE –	6.29
COG –	\$82.39
% Choice –	86%
Profit per head	\$103.30
