Participants enjoyed lunch served by Wm. Nobbe & Co., Inc. while experiencing the demonstrations.

portunity to drive some of the latest John Deere agricultural equipment, such as 8000 and 9000 series tractors, Sunflower's 33' disk, and a Phoenix 42' Rotary Cutter. John Deere's 45' 5

were glad to have some ground for everyone to work up. It was perfect weather with a great crowd," says Brian Kertz. Over 150 farmers participated in the demonstrations, getting a first hand look at the latest capabilities of the equipment available.

AMS (Ag Management Solutions) products were also on hand to demonstrate the ground-breaking techniques offered by John Deere to increase yield and productivity for crop farmers. Brad Nobbe of Wm. Nobbe & Co. says, "AMS products allow producers to implement the most advanced technology in precision agriculture, which enables efficient farm management through guidance and documentation."

Plans are already underway for the 2009 AMS/Tillage Day hosted by Wm. Nobbe & Co., Inc. Δ
