

MP144: Insecticide Recommendations Available

KEISER, ARK.

One of the most-read publications issued by the University of Arkansas Division of Agriculture, MP144, "Insecticide Recommendations for Arkansas," is now available from county offices and downloadable online.

"The whole publication is broken down, not just by crop, but by each pest that can appear in each crop," said Glenn Studebaker, extension entomologist for the University of Arkansas Division of Agriculture. "We also have a rating performance chart at the be-

ginning of each section so you can look at the chart and get an idea of how effective those insecticides are against each of the particular pests."

The book may be obtained through the online ordering system at http://www.uaex.edu/Other_Areas/publications/default.asp, or through your county office.

The searchable and downloadable PDF can be found at http://www.uaex.edu/Other_Areas/publications/HTML/MP-144.asp. Δ
