

Mayberry Seed Co. To Celebrate 40th Anniversary

ESSEX, MO. Mayberry Seed Co. will celebrate 40 years of selling seed corn and soybeans during the month of January for 2011. “We’ve seen the dynamics of the seed industry dramatically change over the last 15 years with new technologies”, says Owner and General Manager Larry Mayberry. “Mayberry Seed Co. has always focused on delivering the best genetics and trait technologies for our corn and

soybean growers throughout the last 40 years and will continue to do so moving forward.” Mayberry Seed Co. has been selling AgVenture corn and soybeans since January of 2000. To compliment top quality corn and soybean varieties, the AgVenture Maximum Profit System™ has been an important tool that growers have utilized the last three years to improve their production (APH), lower their cost per bushel and improve their profitability.
