

Perkins Sales Adds Bagger, Unloader Lines

BERNIE, MO.

We have been serving the agricultural industry for over 20 years. It's our goal to apply the innovative technology available and new equipment that will help farmers save time and money, resulting in an overall improvement to the farm's bottom line. We keep lines of full season replacement parts and equipment for planting, tillage, spray and harvest.

This past year at Perkins Sales we have offered Richiger Dry Grain Baggers and Unloaders. These have proven to be efficient, convenient and economical for short term grain storage. A farmer can harvest and store crop on-site without delays, and sell grain when he wants to take advantage of market increases.

Planter customization is a big part of what we do here at Perkins Sales. There are lots of accessories that will optimize your planter's performance without spending a fortune. We service your JD meters with Precision Planting eSets and MeterMax computer calibration. Precision Planting has corn, cotton and soybean plates available. You can get real singulation, without doubles or skips. The new 20/20 monitor can find problems while there is still time to

eliminate them; no more waiting till the crop comes up to find a problem!

When you start to spray, remember that we carry tanks & racks, fittings, filters, automatic spray systems, and a large variety of spray tips. We also keep stainless fittings & poly fittings up to 3". We have many different brands of spray booms to suit your needs. New, this year, are the Schaben and Fast booms. These heavy-duty booms offer a great alternative to self-propelled units.

We keep spindles and lots of replacement parts for your JD or Case/IH cotton pickers. So you can pick your crop once and pick it clean, we keep our aggressive 9-barb spindles and Deep Dish Doors. All our picker parts meet manufacturer's specifications or better; our prices beat manufacturer's prices, and that's better for you.

We would like to thank all of our customers for allowing us to serve them. We would also like to thank those who took time to read this and look forward to serving your agricultural needs. You can call us toll-free at 877-293-5794 or e-mail cindy@perkinssales.com for a free catalog. Δ
