

Planter Customization Is Big Part Of Offerings At Perkins Sales

BERNIE, MO.

We have been serving the agricultural industry for over 25 years. It's our goal to apply the innovative technology available, to your existing equipment and offer new equipment that will help you save time and money, resulting in an overall improvement to your farm's bottom line. We keep lines of full season replacement parts and equipment for planting, tillage, spray and harvest.

Planter customization is a big part of what we do here at Perkins Sales. There are lots of accessories available that will optimize your planter's performance without spending a fortune. We service your JD vac meters with Precision Planting eSets and MeterMax computer calibration. Precision Planting has corn, cotton and soybean plates available. You can get real singulation, without doubles or skips. The new 20/20 monitor can find problems while there is still time to eliminate them; no more waiting till the crop comes up to find a problem! Add on RowFlow to simplify variable rate and swath control and the AirForce with automatic down force control. New, for this year is the WaveVision seed sensors that will give you a truly accurate count of hill drop cotton or soybeans, even through dust and debris. By reading the mass of objects passing the sensor, it counts only single seeds, even if several drop at one time. Also, new for the upcoming planting season is the CleanSweep system for effortless adjustment of your row cleaners from the tractor cab. We also offer row cleaners, coulters, closing systems, seed manufacturers such as Yetter, Dawn, Martin, Sunco and Schaffert.

We have offered Richiger Dry Grain Baggers and Unloaders for the past several years. These have proven to be efficient, convenient and economical for short term grain storage. Your farm can harvest and store crop on-site without delays, and sell grain when you want, to take advantage of market increases or dated delivery premiums.

Cultivators are on the come-back recently, with all the chemical resistant weeds popping up. Cultivators are an efficient and economical

solution to spraying. So far, no weeds have developed resistance to cold, hard steel. We recommend the Hiniker 6000 cultivator for high-residue situations and because of its versatility. We also offer a heavy-duty rolling cultivator, the Field-Trek which is another excellent choice for herbicide resistant weeds. Both have several add-on options to meet the needs of your farm. Gandy air seeders added to the cultivator are great for interseeding in the fall.

When you start to spray, remember that we carry tanks & racks, fittings, filters, automatic spray systems, and a large variety of spray tips. We also keep stainless fittings, Banjo poly fittings up to 3" and we have access to larger fittings for plumbing and tankers. We have a selection of brands of spray booms to suit the needs of any size farm. We offer booms and sprayers from AgSpray, Bowman, Dickey, Fast, Redball, and Schaben booms. These heavy-duty booms up to 120 ft. offer a great alternative to self-propelled units. Hooded units and units for small jobs like pastures and end rows are also available.

We keep spindles and lots of replacement parts for your JD or Case/IH cotton pickers. In addition to our standard spindles, we keep our aggressive 9-barb spindles and Deep Dish Doors, so you can pick your crop once and pick it clean. All our picker parts meet manufacturer's specifications or better; our prices beat manufacturer's prices, and that's better for you. Most of our parts are American made, and that's better for all of us.

We are adding to our grain handling replacement parts all the time. We carry a lot of the high wear parts for JD and Case headers. We can order gear boxes, poly-tin and larger items specifically for your machine.

We would like to thank all of our customers for allowing us to serve them. We would also like to thank those who took time to read this and look forward to serving your agricultural needs. You can call us toll-free at 877-293-5794 or e-mail cindy@perkinssales.com for a free catalog. △
