

# Schaffert Mfg. Profitable Seed Solutions

## INDIANOLA, NEB.

**F**or the 2009 planting season we are very pleased to announce the release of our New Liquid Fertilizer Disc. It underwent extensive field tests during the 2008 planting season and feedback from farmers has been overwhelming! This new liquid disc is designed for John Deere, Kinze, and White Planters. It has a center pivot design for constant pressure and flexibility. The New Fertilizer Disc is designed to fit most angular press wheel brackets, has a 9 inch steel disc, with triple sealed bearing, and oil impregnated pivot bushings. Designed for all soil types/conditions and has similar features of the 2x2 systems. Call for further details and

ask about our Product Demo DVD's!

Consistency, durability, and a true pioneer in the industry. All come together Schaffert Mfg's line of innovative planter and drill attachments. For over 12 years we have consistently maintained the shape and concept of the Rebounder Seed Cover, making it one of the most popular attachments out there. However, as a true pioneer, we are continually researching ways to make ALL of our other profitable seed solutions better, knowing and understanding the needs of farmers now and foreseeing the future. See our complete line of products at [www.schaffert.com](http://www.schaffert.com).  $\Delta$
