

Sentinel Building Systems Announces New Building Line

OBION, NEB.

Announcing the Frontier, by Sentinel Building Systems, our newest building line for the small to medium sized storage, garage, shop market. Available as either all steel or a steel wood combination, this building line provides the flexibility and economy needed in today's building market.

Sentinel is now able to manufacture complete

roll formed building frames with minimal manual fabrication time. The reduced labor and fabrication time for the Frontier line equals less cost and sustained high quality. With a clear span frame that follows the roofline you retain the overhead clearance for a clean unencumbered workspace. Many user-friendly interior finish features incorporated into the Frontier line make it a great choice for the handy person looking to do some of the work themselves. Δ
