

Syngenta Crop Protection Is Proud To Announce *The Heartland Laser Tour*

Details: The science behind Plant Performance™ consists of more than 20 years of research performed in laboratories, in thousands of grower fields and on more than 100 crops worldwide. Through science, Quilt Xcel™, Quilt® and Quadris® fungicides provide broad-spectrum disease control, help boost yields and increase the productivity of the land. This year, Syngenta is bringing this science to Vincennes, Indiana through the educational and entertaining laser show, the Heartland Laser Tour.

It is a free event that will be fun for the whole family! See two exciting 30-minute laser shows featuring music by artists from the '70s, '80s, '90s and today.

This is one of many stops of the Heartland Laser Tour through March 31. To see all the locations, visit www.plantperformance.com.

We are asking laser show viewers to take a photo or short video and send

it to quiltxcel.donate@syngenta.com by March 31, 2010. In lieu of an individual prize and in the spirit of the American farmer, Syngenta will make a donation, for every photo or video received, to the American Red Cross toward the purchase of quilts and supplies for those in Haiti left without shelter. For more information, visit www.plantperformance.com.

**Share the science.
Spread the kindness.**

Contact: For more information about the Heartland Laser Tour or for interviews, please contact Allison Thiebaud at 919-870-5718 or athiebaud@gibbs-soell.com. △
