

Valley Center Pivots Are Smart Choice

CHARLESTON, MO.

Mid-Valley has represented Valmont Industries since 1977 – that’s 33 years of installing & servicing Valley center pivots. That very first pivot is making circles right now, watering up wheat for the 2011 crop. Val-

ley pivots are the strongest, most reliable pivots in the market. Whether it is a new model 5000, 7000, or the reliable work-horse 8000, buying a Valley center pivot from Mid-Valley Irrigation is a smart choice for today and a wise investment for the future. Δ
